## ORGANIZING COMMITTEE

**Prof. H. Beushausen**  
(Co-Chairman)  
University of Cape  
Town, South Africa

**Prof. B. Boshoff**  
(Co-Chairman)  
Stellenbosch University,  
South Africa

**Prof. M. Alexander**  
(Co-Chairman)  
University of Cape  
Town, South Africa

**Prof. F. Dehn**  
Gesellschaft für  
Materialforschung und  
Prüfungsanstalt für das  
Bauwesen Leipzig mbH  
(MFPA) & University  
Leipzig, Germany

**R. Heiyantuduwa**  
University of Cape  
Town, South Africa

**Dr M. Otieno**  
University of the  
Witwatersrand, South Africa

## OVERVIEW OF PAPERS

### Keynote Lectures

Performance-Based Design of Bridges and the  
Brenner Base Tunnel / Bergmeister / 3

Sustainability and Performance Design of  
Structures With Precast Elements /  
Fernández-Ordóñez / 13

*fib* Model Code 2020 – A New Development  
in Structural Codes: Towards a General Code  
for Both New and Existing Concrete Struc-  
tures / Matthews · Bigaj-van Vliet · Dieteren / 22

Performance-Based Service Life Design in the  
2021 Version of the European Concrete Stan-  
dards – Ambitions and Challenges / Helland / 32

Durability Requirements for Concrete Nowa-  
days and in the Future – Key Parameters for  
Performance Concepts / Müller / 42

Performance-Based Concrete Durability  
Design and Specification in South Africa –  
Background, Implementation, and Quo Nunc?  
/ Alexander / 52

Concrete Bridge Design for Aesthetical Per-  
formance / Kruger / 63

Forensic Engineering: Need for a New Profes-  
sional Profile / Walraven / 73

A Performance-Based Approach for Mechan-  
ical Concrete Properties – Roadmap Towards  
Constitutive Coherences / Dehn · Herrmann / 83

Sustainable Concrete and Concrete Struc-  
tures – Challenge for a Sustainable Future /  
Hajek / 91

### Chapter 1: Structural Analysis and Design

Effect of Quality Control on Reliability of  
Reinforced Concrete Structures According to  
Eurocodes / Holický · Diamantidis · Sykora / 103

The *fib* Model Code for Concrete Structures  
2010: The Role in Development and Revision  
of Russian National Codes / Falikman · Zvezdov / 105

Safety of Solid Hydraulic Structures / Kunz / 107

Composite Concrete Construction With  
Reference to Sasol Coal Mining Projects / Fliss  
· Szymczak / 109

Building Concrete Shells Without Formwork  
and Falsework / Kromoser · Kollegger / 111

Hazelmere Dam Raising / Botha · Booysse · Fitz / 113

Modified Tubed Mega Frame Structural  
Systems for Tall Buildings / King · Hallgren · Partovi  
· Svärd / 115

Concrete Structures in the Sea: Some Ex-  
amples / Olsen / 117

A Modern Heritage Structure in India / Panday / 119

Bond Performance of Post-Installed and  
Cast-In-Place Reinforcing Bars Using Modi-  
fied Beam-End-Test Specimen / Rex · Sharma ·  
Hofmann / 121

An Investigation of the Shear Stress-Strain  
Characteristics of Nuclear Power Plant Wall  
Elements With High Strength Materials / Park  
· Cho · Koh / 123

New Strategy for Modelling Air Leakage  
Tightness of Pressure Containment Vessels of  
Nuclear Power Plants: Large-Scale Applica-  
tion to Vercors Containment Vessel / Mozayan  
Kharazi / 125

The Leakage Behaviour of a Prestressed  
Concrete Containment Wall Segment Under  
Different Air Loads / Herrmann · Müller · Niklasch ·  
Michel · Ponnelle · Masson / 127

Damage Predictions in Concrete Silo Using  
Finite Element Analyses / Kermiche · Haddi · Djelal ·  
Redjel · Boussaid / 129

Material Model for Nonlinear Finite Element  
Analyses of Large Concrete Structures / Engen-  
Hendriks · Øverli · Aldstedt / 131

Reinforcement Lay-Out Implications for  
Reinforced Concrete Half-Joint Structures /  
Besnerck · Lees · Morley / 133

Numerical Limit Analysis of Precast Con-  
crete Structures / Herfelt · Poulsen · Hoang · Jensen / 135

Aging of Standard Concretes and Their Effect on Concrete Cone Failure / Wendner · Czernuschka · Nincevic · Marcon / 137

Composite Steel Reinforced Concrete Columns for High-Rise Buildings / Gramblička · Frólo / 139

Development of Ducted Columns for Smoke Extraction / Bardzinski · Abdi / 141

Shear Behaviour Evaluation of RC Columns Subject to Low-Velocity Impact / Chen · Zhou · Ma / 143

Response Analysis of Frame Elements Under Blast Loads / Guner / 145

NLFEA of Reinforced Concrete Shear Walls Under Cyclic Loading by Means of PARC\_CL2.0 Crack Model / Bellelli · Scolari · Vecchi / 147

Fatigue Behaviour of Fasteners in Case of Concrete Failure: Numerical and Experimental Investigations / Tóth · Ózbolt · Fuchs · Hofmann / 149

New Investigations of Concrete Dowels for High Dynamic Load Cycles Based on Hybrid-Towers for Wind Turbines / Koob · Minnert / 151

Numerical and Experimental Investigations of the Warming of Fatigue-Loaded Concrete / von der Haar · Wedel · Marx / 153

Experimental Investigation of Fatigue Process in Concrete Under High-Cycle Loading / Thiele · Petryna · Rogge · Baeßler / 155

Evaluation of Strut-and-Tie Provisions of *fib* Model Code 2010 for RC Non-Slender Members Under Point Loads / Uzel / 157

Cracking Analysis of RC Ties Considering the Effect of Internal Secondary Cracks / Debernardi · Taliano / 159

Advanced Stochastic Algorithm to Simulate Transverse Cracking in Reinforced Concrete Tension Members / Khan · Huguet · Parente · Erlicher · Kotronis / 161

Crack Spacing Model for Reinforced Concrete Tension Members Based on Damage Zone and Strain Compliance Concepts / Kaklauskas · Ramanauskas · Ng · Jakubovskis · Juknys / 163

Load-Bearing Behaviour of Shape-Optimised Struts Made of UHPC / Henke · Fischer / 165

Crack Predictions Using Random Fields / van den Bos · Garofano / 167

A New Approach in Predicting the Mean Crack Spacing of Flexural Reinforced Concrete Elements / Kaklauskas · Ramanauskas / 169

Cracking of Massive Concrete Structures Under Monotonic Loading: Results of the CEOS.fr Experiments / Rospars · Cortade / 171

## Chapter 2: Analysis and Design: Flexural and Prestressed Members

Approaches for Suitable Modelling and Strength Prediction of Reinforced Concrete Slabs / Cantone · Bellelli · Muttoni · Ruiz / 175

Reinforced Concrete Slabs Under Impact – Scale Effects / Hering · Kühn · Curbach · Häußler-Combe / 177

The Influence of Transverse Reinforcement on the Cracking Behaviour of RC Panels and Slabs / Keuser · Berger · Keuser · Purainer / 179

New Void Formers for Biaxial Voided Slabs / Albert · Schnell · Busch / 181

A Review of the Span-to-Depth Ratio Methods of Design / Tovi · Goodchild · Bahadori-Jahromi · Sofroniou / 183

Quantitative Evaluation of Eurocode Provisions With Respect to Structural Robustness on the Basis of Numerical Analysis of RC Beams Including Membrane Action / Droogne · Botte · Caspele · Taerwe / 185

Numerical Analysis of RC Slab Under Blast Loads Using the Coupling of LBE and ALE Methods in LS-DYNA / Shuaib · Daoud / 187

Performance Evaluation of Reinforced Concrete Flexural Members During Fire Using Nonlinear Static Analysis / Lakhani · Sharma · Hofmann / 189

Secondary Effect of Prestressing at ULS / Pažma · Halvonik · Borzović / 191

On the Exact Computation of the Required Prestressing Force in Concrete Structures via Inverse Analysis / Skatulla · Etienne · Sansour / 193

Verification of the Bursting and Spalling Formulas in the *fib* Model Code by Finite Element Analyses of Anchorage Zones of Pre-Tensioned Girders / Van Meirvenne · Taerwe · Boel · De Corte / 195

Evaluation of Design Approaches for Bond Anchorage in Pre-Tensioning / Geßner · Schmidt / 197

Study and Design of Anchorage Corner Blisters of Post-Tensioning Tendons / Marchão · Lúcio · Ganz / 199

Shear Behaviour of Post-Tensioned Concrete Beams With a Low Amount of Transverse Reinforcement / Huber · Huber · Kollegger / 201

## Chapter 3: Analysis and Design: Shear and Torsion

Assessment of Alternative Shear Resistance Models for Reinforced Concrete Sections / Viljoen · Retief · Sykora / 205

Analysis of Shear Transfer Actions in Reinforced Concrete Members Using Refined Measurement Techniques / Cavagnis · Ruiz · Muttoni / 207

Investigation of  $v_{min}$  Based on Experimental Research / Yang · van der Veen · Hordijk · de Boer / 209

Shear Tests on Large Prestressed Concrete T-Beams / Ensink · van der Veen · de Boer / 211

Reliability of the Models for Assessment of Punching Resistance of Footings / Halvonik · Hanzel · Majtanova / 213

Shear Force Distribution in RC Slabs Subjected to Punching: Solid Nonlinear FE Analysis / Shu · Plos · Zandi · Johansson · Nilenius / 215

Effect of Openings or Differences in Slab Thickness on the Load Distribution of Slabs Subjected to Punching Shear / Molkens / 217

Shear Resistance Mechanism Evaluation of RC Beams Based on Arch and Beam Actions / Nakamura · Iwamoto · Fu · Yamamoto · Miura / 219

Modelling the Ultimate Shear Behaviour of Deep Beams With FRP Internal Reinforcement / Mihaylov / 221

A Four Metre Deep Shear Test: Comparing International Predictions to Observations / Bentz · Collins / 223

A Macro-Element for the Nonlinear Analysis of Deep Beams Based on a Three-Parameter Kinematic Model / Liu · Mihaylov / 225

Influence of Aggregate Type on Shear Strength of RC Beams Without Shear Reinforcement / Huber · Huber · Kollegger / 227

The Influence of the Height of the Compression Zone of a Cross Section on the Load-Bearing Capacity of Reinforced Concrete Beams Subjected to Shear and Bending / Bodzak / 229

Analysis of Concrete Contribution in the Shear Strength of Beams Reinforced With FRP / Steel Bars Without Stirrups / Kotynia · Kaszubska / 231

## Chapter 4: Structures Exposed to Seismic Loading

Low Damage Seismic Resistant Technologies for Performance-Based Design of Accelerated Bridge Construction in High Seismicity / Mashal · Palermo / 235

Seismic Performance of Concrete Arch Bridges / Mandić Ivanković · Srbić · Radić / 237

A Case Study to Improve Seismic Performance of a Rigid Frame Viaduct Based on 3-D Dynamic Analysis / Matsuura · Takeyama / 239

Towards Development of a Nonlinear Structural Analysis Analytical Model for Evaluation of Structures / Mbewe · van Zijl / 241

Seismic Behaviour of Traditional Multi-Storey Precast Reinforced Concrete Frame Building / Zhao · Zhu · Lu / 243

Study of a New Earthquake Resilient Shear Wall / Liu · Jiang / 245

Seismic Behaviour Research of L-Shaped Partly Precast Shear Wall With Boundary Elements Cast-In-Situ / Li · Wang · Lu / 247

Study on the Seismic Performance of L-Shaped Sandwich Insulation Precast RC Shear Wall / Lu · Li · Wang / 249

Modelling Parameters for Beam-Column Joints in Seismic Performance Assessment of Structures – A New Proposal / Sharma · Hofmann / 251

Investigation on Seismic Behaviour for Structural Integrity of a Collapsed RC Building / Oyegebile / 253

Size Effect in Shear Failure on Reinforced Concrete Beams / Terai / 255

## Chapter 5: Shrinkage and Creep

Improving the Quality of Prediction Models for Concrete Creep and Shrinkage / Suza · Kollegger / 259

Evaluation of the Creep Coefficients of Inter-national Concrete Creep Prediction Models / Fanourakis / 261

Shape Correction Factors for Drying Shrinkage of Several Typical Concrete Cross-Sections / Reybrouck · Wendner · Caspeele · Taerwe / 263

Effect of Size and Thermal History on Drying Shrinkage / Darquennes · Vasylichenko · Benboudjema / 265

Drying and Shrinkage of Large Concrete Specimens – Experimental Research / Vinkler · Vitek / 267

Cracking Due to Restrained Shrinkage of Massive Concrete Structures: Results of the CEOS.fr Experiments / Torrenti / 269

Proposed Mould for the Assessment of Pure Plastic Shrinkage Cracking / Steyl · Combrinck · Boshoff / 271

Analytical Model of the Cracking of Plastic Concrete / Combrinck · Boshoff / 273

Concept to Predict Crack Initiation and Crack Development in Fairfaced Concrete Screeds / Weiler · Waldmann / 275

Controlling Crack Widths in Walls Restrained at Their Base and Ends / Micallef · Vollum · Izzuddin / 277

Influence of Internal Curing on Autogenous and Drying Shrinkages of Ultra-High Performance Concrete Considering Heat Treatment / Kang · Hong · Moon / 279

Experimental Investigation and Modelling of Temperature Effects on Basic Creep of Concrete / Vidal · Sellier · Cagnon · Ladaoui · Bourbon / 281

## Chapter 6: Materials, Production, Testing, Modelling, Construction

Solutions for a Low-CO<sub>2</sub>, Eco-Efficient Cement-Based Materials Industry / Scrivener · John · Gartner / 285

New Zealand Experience With Performance-Based Specifications for Concrete Used in the Rebuild of Christchurch After the Canterbury Earthquakes / Mackechne / 287

Influence of Modern Mixing Systems for Producing Self-Compacting High Performance Concrete / Beitzel · Beitzel / 289

The Use of Rice Husk Ash in Rigid Highway Pavements / Hyndman · Ahmed / 291

Suitability of Corncob Ash as a Partial Cement Replacement / Kamau · Ahmed · Hirst · Kangwa / 293

The Use of Electric Arc Furnace Slag as a Coarse Aggregate in Alkali-Activated Concretes / Kovtun · Ingram / 295

The Role of Metal-Proton Exchange Reactions in the Water-Induced Corrosion of Wollastonite / Giraud · Thissen / 297

The Influence of Fly Ash and Ground Granulated Blast Furnace Slag on the Elastic Modulus of Concrete / Sun · Fanourakis / 299

Structural Lightweight Aggregate Concrete With Density Below 1100 kg/m<sup>3</sup> / Martius-Hammer · Shon · Kjellmark / 301

Feasibility Study of Fast Carbonation of Recycled Concrete Aggregates / Cazacliu · Gobert · Condoret · Huchet · Camy · Torrenti / 303

The Influence of Aggregate on the Elastic Modulus of Concrete / Sun · Fanourakis / 305

Five Years of International Collaborative Research on Self-Healing Capacity of Cementitious Composites / Ferrara · Caggiano · di Luzio · Etse · Gettu · Krelani · Ferreira · Flores · Serna · Filho / 307

Development of Novel Low Thermal Conductivity Concrete Using Aerogel Powder / Tsioulou · Erpelding · Lampropoulos / 309

Recent Development of Ultra-High Strength Prestressing 7-Wire Strand 17.8 mm With Epoxy Coating / Nakae · Tanaka · Oshima · Matsubara / 311

The Strength Relationship Between the Cube and Cylinder / Sun · Fanourakis / 313

Massive Numerical Simulations at the Service of Major Construction Projects to Deal With Concrete Early Age Cracking Issues / Meyer · Linger · Boutillon · Proux · Duverneuil / 315

The Effect of Size in Concrete Compressive Failure / Muciaccia · Rosati / 317

Computed Tomography: New Possibilities in Testing of Concrete / Balázs · Czoboly · Lublőy / 319

The Effect of Construction Method and Formwork Choices on the Scope of Construction Projects / Mouton · Marinov / 321

Application of a Cusum Control System for Enhanced Robustness of the Flow Properties of Self-Compacting Concrete / Schmidt · Kühne / 323

Quality-Assured Solutions for Vegetative (Green) Roof Systems on Concrete Decks / Capener · Edwards · Emilsson · Malmberg · Pettersson Skog / 325

Experience of Underwater Concrete for Bored Piles and Diaphragm Walls in Mozambique / Seitz · Pengyu · Swanepoel / 327

Investigating the Carbonation and Mechanical Performance of Reactive MgO Cement Based Concrete Mixes / Unluer / 329

Improving Hardened Properties of Portland Cement Concrete With Surface-Applied Colloidal Nano-Silica / Rollins · Owino · Fomunung / 331

Recycling of Waste Technological Sludge in Alkali-Activated Concretes / Kalina · Bilek · Soukal · Opravil / 333

## Chapter 7: Fibre Reinforced Concrete

How to Deal With Scatter in Steel Fibre Concrete Structures – A Swedish Proposal / Silfwerbrand / 337

Modelling the Actual Behaviour of UTRCPC / Kearsley · Mostert / 339

The Mechanical Properties of UHPC Reinforced by Different Types of Fibre / Vatannia · Kearsley · Mostert / 341

Experimental Quantification of the Cracking Localisation Phenomenon in Tensile R/FRC Bars / Dancygier · Karinski · Navon / 343

Stress-Strain Behaviour for High-Strength Steel Fibre Reinforced Concrete Under Compression and Tension / Lu · Zhang · Nian / 345

Combined Non-Destructive Method for Evaluating the Mechanical Performance of Ultra-High Performance Fibre Reinforced Concrete (UHPRC) / Lampropoulos · Tsioulou · Paschalis / 347

Fatigue Behaviour of Carbon Textile Reinforced Concrete Under Tensile Loading / Niederwald · Keuser / 349

Mechanical Properties of Steel Fibre Reinforced Geopolymer Composites Cured Under Ambient Temperature / Al-Majidi · Lampropoulos · Cundy / 351

Durability Design of Steel Fibre Reinforced Concrete for Severe Exposure Conditions / Edvardsen · Jackson / 353

Corrosion Resistance of Steel Fibre Reinforced Concrete – A Literature Review / Marcos-Meson · Michel · Solgaard · Fischer · Edvardsen · Skovhus / 355

“Real Time” Quality Control System for Steel Fibre Concrete / Vitt / 357

Deterministic Based Optimisation of a Shotcrete Tunnel Lining / Laniková · Venclovský · Štěpánek / 359

Design of Fibreglass Reinforcement in Precast Tunnel Segments / Meda · Rinaldi · Spagnuolo / 361

Influence of Toughness on the Shear Behaviour of Steel Fibre Reinforced Self-Consolidating Concrete Beams / Zhang · Shi · Ding · Ni · Zhang / 363

Flexural Performance of Hybrid Fibre Reinforced Concrete Precast Tunnel Segment / Ni · Zhang · Shi · Shi · Zhang / 365

## Chapter 8: Precast Technology

First-Year Results of the North American Precast Concrete Sustainable Plant Program / Lorenz · Frank / 369

Precast Network Arches: Aesthetics, Structural Efficiency and Construction Speed / Yousefpour · Helwig · Bayrak / 371

Structural Design and Construction System of the Suita City Football Stadium / Okude / 373

Wind Turbine Towers out of Semi-Precast Elements – Structural Challenges of the Erection Process / Fischer · Schönweger · Kollegger / 375

Hybrid Precast High Performance Concrete System for Multistorey Buildings / Zavrliaris / 377

Development of a Total Precast System for Prison Cells / D'Arcy / 379

Concrete Strength in Precast Thin-Walled Elements / Flaga · Derkowski · Surma / 381

Experimental Analysis of Column to Column Connections for Precast Concrete Truss Towers to Support Wind Energy Generators / Souza · Lucio · Chastre · Souza · Martins / 383

Load Carrying Capacity of Shear Wall T-Connections Reinforced With High Strength Wire Ropes / Joergensen · Bryndum · Larsen · Hoang / 385

Load Bearing and Stability Behaviour of Concrete Sandwich Panels Under Compressive Load / d'Escurac · Pahn · Schnell / 387

Development of Novel Connection Methods Between Precast Concrete Panels / Vella · Vollum · Jackson · Stehle / 389

Tensile Capacity of U-Bar Loop Connections With Precast Fibre Reinforced Dowels / Sørensen · Hoang · Olesen · Fischer / 391

Structural Behaviour of Sandwich-Roof Panels With Different Distributions of Bar-Shaped Connectors / Weiler · Schnell · Pahn / 393

A New Construction Method for Double-Wall Elements Made of UHPC / Preinstorfer · Kollegger / 395

Test and Analysis of L-Shaped Precast RC Shear Walls With Middle Cast-In-Situ Joint / Wang · Li · Lu / 397

## Chapter 9: Bridge Structures

COST Action TU1406: Quality Specifications for Roadway Bridges, Standardisation at a European Level (BridgeSpec) – Performance Indicators / Campos e Matos · Casas · Strauss · Fernandes / 401

Service Life Performance of Bridges – A Case Study Investigation / Dette · Sigrist / 403

Hydrophobic Impregnation on Concrete Elements of Rion Antirion Bridge / Papantoniou · Corbett · Stathopoulos-Vlavis · Donadio · Anagnostopoulos / 405

The Initial Environmental Effects on the Design of a 90 m Long Integral Bridge in South Africa / Skorpen · Kearsley · Clayton · Kruger / 407

Defining Loading Criteria for Proof Loading of Existing Reinforced Concrete Bridges / Koek · Koek · Lantsoght · Yang · de Boer · Hordijk / 409

Traffic Loading in South Africa – Remedial Action / Lenner · Viljoen / 411

Use of Fly Ash for Africa's Largest Suspension Bridge in Mozambique / Swanepoel · Seitz · Pengyu / 413

The Windsor Road Cable-Stayed Bridge for the Sydney Metro Northwest (SMN) Project, Australia / Khan / 415

A Multi-Featured Arch Bridge in India / Nag · Panday / 417

Detailed Design of the Almonte Viaduct / Arribas · Bernal · Pérez · González / 419

Almonte Viaduct. Construction Process / Caverio · Arribas · Carnero · Jiménez / 421

The New Bridge Over the Guaíba River – A 100,000 m<sup>2</sup> Precast Solution / Santos · Blancas · Rossi · Stucchi / 423

Upgraded Features of a Long Flyover in India / Nag · Panday / 425

Design and Construction of 120 m Span Arch Bridge in India / Panday / 427

Integral Abutment Bridges Approach Embankment: Design Solution Using Soil Reinforcement Above the Transition Slab / Gama · Fartaria · Almeida · Pinto / 429

Development and Construction of a Non-Metal Bridge / Ogata · Ohshiro · Fukuda · Kasuga · Asai · Nagamoto / 431

Design and Construction of Composite Structures for New Expressway Bridges in Japan / Sakai / 433

Feasibility of Use of Void Formers in Concrete Slab Bridges Using Chilean Codes: Design and Testing / San Martín · Valenzuela / 435

Simulation of the Behaviour of a New Durable Transition Structure for Long Integral Abutment Bridges / Eichwalder · Kollegger / 437

Shear Capacity of the Ruytenschildt Bridge / Lantsoght · van der Veen · de Boer / 439

Investigation of Aramid FRP Tendons Used in PC Bridges, a Quarter of a Century After Construction / Sanga · Asai · Nagamoto · Fujiwara / 441

Towards Slender, Innovative Concrete Structures for Replacement of Existing Viaducts / Reitsemá · Luković · Hordijk / 443

Design of an Experimental Arch Pedestrian Bridge Made of UHPC / Tej · Kněž · Blank · Císlar / 445

Performance Monitoring of a Prestressed Concrete Railway Viaduct: Implementation of a System and First Results / Busatta · Moyo / 447

## Chapter 10: Durability and Service Life

Achieving Concrete Performance in Chloride Exposures / Hooton / 451

Taking Performance to Practice – Simplified *In Situ* Approach for Specifying Concrete for Chloride Environments / Nanukuttan · Basheer · Convie · Tang · McCarter / 453

Serviceability of Concrete: What Does It Mean? / Mindess / 455

National and International Code-Based Deterministic and Full Probabilistic Modelling to Describe Reliability of Various Australasian Marine Structures / Papworth · Gehlen / 457

Testing *fib* Prediction of Durability-Related Properties / Moro · Torrent / 459

Performance-Based Design of Eco-Concrete / Juhart · David · Baldermann · Kruschev · Mittermayr / 461

Practical Implementation of Durability Index Performance-Based Specifications: Current Experience / Nganga · Alexander · Moyana · Beushausen / 463

Resistance Classes for Concrete – Discussion of a Possible New Approach / Eckfeldt · Hintzen · Breitschaft / 465

Semi-Probabilistic Approach to the Service Life Design of Concrete Structures Exposed to Chlorides After a Repair Measure / Rahimi · Gehlen / 467

Performance-Based Correlations Between Different Properties in Concrete With Supplementary Cementitious Materials (SCM) / Selander · Westerholm · Trägårdh / 469

Compliance Assessment of Durability Indicators for the New Port of Gaženica / Serdar · Perić · Bjegović / 471

Effect of Carbonation on Durability Indicators and Microstructure in Cement Pastes and Concretes With Supplementary Cementitious Materials / Saillio · Baroghel-Bouny · Pradelle / 473

Durability of Concrete Structures Incorporating Recycled Aggregates / Schmitt · Mai-Nhu · Djjerbi Tegguer · Rougeau · Saillio / 475

Study of Influence of Moisture Content, Portlandite Content and Pore Solution Conductivity on Surface Resistivity of Concrete / Bharath · Dhanya · Santhanam / 477

The Influence of Curing Methods on Durability Indicators and Micro- and Macro Porosity of Concrete / Beushausen · Höhlig · Martin / 479

Durability Performance of Structural Concrete Made With Coarse Recycled Concrete Aggregates / Dodds · Goodier · Christodoulou · Austin · Dunne · Fitt · Snowden / 481

Utilisation of Carbon Fibres in Reinforced Concrete as Integrated Sensor / Quadflieg · Stoljarov · Gries / 483

Structural Sustainability, Quality Control, Durability and Robustness of Underground Metro Structures / Majumdar · Banerjee · Hati / 485

Strength and Durability Properties of Portland Cement Concretes in an Inland Urban Environment / Yunusa · Ballim / 487

Properties of Concrete With NaCl Solution Under Freeze-Thaw Cycles for Performance-Based Design / Tamon · Yi · Dawei / 489

Reliability Calibration of a Set of Spanish Concretes by Exposure Class Deemed-To-Satisfy Prescriptions / Andrade · Martínez · Sanjuan · Rebollo · 491

Critique of the Environmental Exposure Classification for Marine Concrete Structures in the Tidal Zone / Moore · Beushausen · Otieno / 493

### Chapter 11: Deterioration Mechanisms and Reinforcement Corrosion

Using Wenner Probe Resistivity to Estimate Chloride Diffusion Coefficients in Concrete / Otieno · Mutale · Beushausen / 497

Chloride Transport Testing of Blast Furnace Slag Cement for Durable Concrete Structures in Norway: From Two Days to One Year Age / Polder · de Rooij · Larsen · Pedersen / 499

Concrete Durability Improvement in the Presence of Chlorides Using a Silane-Based Hydrophobic Impregnation / Donadio · Schuerch · Marazzani / 501

Preventing Chloride Ingress in Concrete With Water Repellent Treatments – A Ten Year Field Experiment / Selander · Andersson · Trägårdh / 503

Three Examples of Using Hydrophobic Impregnations in Tunnels / Schießl-Pecka · Sodeikat · Mayer / 505

The Effect of Limestone Mineral Addition and Cement Kiln Dust on the Chloride Ingress Into Mortar Specimens Made With Cement, Fly Ash and Slag / Benn · Baweja · Mills / 507

A Trade-Off Concept for Lightweight Concrete in Chloride Environments / Dunne · Newlands · Christodoulou · Goodier / 509

Modelling Chloride Ingress Under Freeze-Thaw Loading – 3D FEM Approach / Laukkanen · Pinomaa · Andersson · Ferreira · Bohner / 511

Design and Construction of Durable Concrete Bridge Deck Suffering From Frost Damage and De-Icing Salt / Tanaka · Ishida · Iwaki · Satoh / 513

Assessments of Carbonation Ingress In-Field as a Tool to Calibrate Code Requirements / Helland / 515

Parametric Study of Coupled Models for Corrosion Initiation of Reinforcement and Induced Cracking of Concrete Cover / Bohner · Ferreira · Saarela / 517

Correlation Between Mortar Resistivity and the Partial Process (Anodic, Cathodic and Ohmic) of Macro-Cell Reinforcement Corrosion / Hornbostel · Angst · Elsener · Larsen · Geiker / 519

Comparative Study of Alkali-Activated Fly Ash and OPC-Fly Ash Blended Concretes Through Durability Indices, Accelerated Rebar Corrosion and Carbonation Tests / Shekhovtsova · Kovtun · Kearsley / 521

Steps Towards a Performance-Based Design of Concrete Structures in Acidic Environments / Gerlach / 523

Accelerated Test Design for Biodeterioration of Cementitious Materials and Products in Sewer Environments / Lavigne · Bertron · Delagnes · Mengelle · Patapy · Lefebvre · Paul / 525

Concrete Durability Improvement in the Presence of Sulphates Using a Silane-Based Hydrophobic Impregnation / Donadio · Schuerch · Marazzani / 527

Hydration of Wollastonite Competing Carbonation: Microscopic Insights From Density Functional Theory and Ion Spectroscopy / Longo · Thissen / 529

Mineral Additions Efficiency Assessment to Mitigate DEF Risk / Linger · Lavaud · Divet · Cussigh · Barberon · Gotteland / 531

The Mechanisms Behind the Partial Recovery in the Degraded Mechanical Properties of ASR-Affected Concrete / Panesar · Gautam / 533

Chloride Threshold Values from Concrete Blocks Exposed at Rødbyhavn Marine Field Exposure Site / Sørensen · Poulsen · Jönsson / 535

### Chapter 12: Condition Assessment

The Continuing Development of Ultrasonic Techniques for Assessment of Concrete Structures / Corbett / 539

Damage Evaluation for RC Bridge Slabs With AE and AE Tomography / Fukuda · Ogata · Oshiro · Watabe · Kasahara · Takamine · Shiotani · Nishida · Asaue / 541

Condition Assessment and Damage Localisation for Bridges by Use of the Deformation Area Difference Method (DAD-Method) / Erdenebat · Waldmann / 543

Experimental and Theoretical Assessment of Structural Health of Existing Reinforced Concrete Retaining Walls Under Low Frequency Dynamic Loading / Farenjuk · Marienkova · Kaliukh · Farenjuk · Marienkova · Kaliukh / 545

Experimental Study of Continuous Beams and Slabs Under Loss of Support Conditions / Stathas · Bousias · Palios · Strepelias · Fardis / 547

Prestressing of Reinforcing Bars in Concrete Slabs Due to Concrete Expansion Induced by Alkali-Silica Reaction / Hansen · Barbosa · Hoang / 549

Statistical Simulations in Connection With the Estimation of the Characteristic In-Situ Concrete Compressive Strength From Small Samples / Weber · Schnell / 551

Corrosion Risk Testing on Existing Reinforced Concrete Structures for Residual Life and Repair Assessment / Papworth · Klinghoffer · Nygaard · Kristensen · Marosszekly · Barnes · Dyson / 553

Material Properties Study of Seven 100-Years Old Concrete Bridges in Slovakia / Paulik · Bačuvčík · Ševčík · Janotka / 555

Uprating the Test Exactness for the Determination of Concrete Compressive Strength in Existing Structures by Combination of Non-Destructive Testing Procedures / Wilcke · Walther / 557

### Chapter 13: Protection and Repair

Cathodic Protection in Reinforced Concrete Structures: A Preliminary Discussion of the Significance of the Protection Criteria / Sassine · Laurens · François · Ringot / 561

Maintenance and Repair of Steel Reinforced Concrete Structures by Simultaneous Galvanic Corrosion Protection and Chloride Extraction – Field Experiences / Schwarz · Müller · van den Hondel / 563

Novel Type of Discrete Galvanic Zinc Anodes for the Prevention of Steel Reinforcement Corrosion Induced by Patch Repair / Schwarz · Bakalli · Donadio / 565

Incipient Anodes in Reinforced Concrete Repairs: A Cause or a Consequence? / Christodoulou · Goodier · Glass · Dunne / 567

Performance of Repair Materials Exposed to Marine Environment / Khan · Ahmed / 569

Evaluating the Performance of ECC as a Patch Repair Mortar / Sohawon · Beushausen · Omar · van Zijl / 571

Behaviour of Reinforced Concrete Beams Strengthened With Textile Reinforced Mortar (TRM) / Khan · Masood / 573

Strengthening of Concrete Flat Slabs With an Overlaid Reinforced Concrete Layer / Fernandes · Lúcio · Ramos / 575

Investigations on Adhesive Bond Between High Performance Concrete Overlays and NSC Substrates / Randl · Peyerl · Steiner · Steinberger / 577

Application of Novel Repair Materials and Techniques as Sustainable Promise for Durability of Cultural and Historical Heritage in Bulgaria / Rangelova · Traykova / 579

Rehabilitation of Mouille Point Seawall / Gates · Smith / 581

Corrosion Protection Material Replacement in Extradosed Viaduct Cables / Laco · Chrappa / 583

Development of Exchange Technology of Deteriorated Reinforced Concrete Slabs / Morohashi · Mishima · Wada · Aoki / 585

Barriers to the Realisation of Effectiveness in the Cracking Performance of Concrete Patch Repair Mortars in Service / Arito · Beushausen · Alexander / 587

Effect of an Expansive Admixture on Early-Age Cracking of Polymer Modified Mortars / Tchetsgnia Ngassam · Beushausen / 589

## Chapter 14: Structural Strengthening

Strengthening of Arches by the Application of Fibre Reinforced Mortar, Composite Materials and Reinforced Concrete on the Intrados / Kesteloot · Djelal · Benslimane / 593

A Design Method for Strengthening Steel Concrete Beam With Textile Reinforced Concrete / Hamelin · Si Larbi / 595

Heal the Pont Adolphe / Borderon / 597

Oporto's Sports Pavilion – Structural Rehabilitation of a 60 Years Old Landmark / Marques · Campos e Matos / 599

Shear Strength of Existing Members With Plain Rebars / Tinini · Minelli · Plizzari / 601

Iron-Based Shape Memory Alloys Reinforcement for Strengthening of Concrete Structures / Shahverdi · Czaderski · Michels · Motavalli / 603

Life Cycle Cost Analysis for the Seismic Retrofitting and Sustainability of Existing Building Stocks / Kyriakides · Chrysostomou · Tantele · Votsis · Charalambous / 605

Hinged Wall Solutions for the Structural Strengthening of Existing RC Buildings / Belleri · Passoni · Marini · Riva / 607

Strengthening Behaviour of Concrete Beams by UHPC Jacketing / Hong · Hong / 609

Development of a Non-Destructive Testing Method to Assess the Bond Quality of Composite Strengthening Systems on Concrete Structures / Billon · Taillade · Quiertant · Hénault · Maurin · Renaud · Merliot · Benzarti / 611

Evaluation of RC Beams With Induced Damages Strengthened by CFRP / Elraey · Alshebani / 613

Experimental Study to Determine if the Strength of an Epoxy Bonded Steel Plate to Concrete Can Be Increased by Adding Mechanical Anchors / Bruwer / 615

Evaluation of Damaged RC Beams Strengthened in Flexure by Pre-Tensioned UFC Panel / Limpaninlachat · Matsumoto · Nakamura · Kono · Niwa / 617

Experimental Study to Determine if the Strength of an Epoxy Bonded Joint of CFRP Plates to Concrete Can Be Increased by Adding Mechanical Anchors / Bruwer / 619

Strengthening of Existing Road Bridges With External Post-Tensioning / Mandić Ivanković · Radić · Skokandić / 621

A New Approach for Column Jacket Design / Várdai · Bódi · Madaras / 623

Behaviour of a RC Bridge Strengthened With PT Tendons Under High Temperature in Tours (France) / Vion · Bennoui · Chipeaux / 625

Retrofitting Unreinforced Load-Bearing Masonry With a Sprayed SHCC Overlay / van Zijl · de Beer / 627
