

## Organizers

The **fib** Symposium Tel Aviv 2013 was organized by the Israeli Association of Construction & Infrastructure Engineers (IACIE) and the Faculty of Civil and Environmental Engineering, Technion – Israel Institute of Technology and was endorsed by **fib** – International Federation for Structural Concrete

## Scientific Committee

### Chairman

Gordon M. Clark, United Kingdom

### Co-Chairman

Avraham N. Dancygier, Israel

### Members

Andrzej B. Ajdukiewicz	Poland	Giuseppe Mancini	Italy
Mark Alexander	South Africa	Alberto Meda *	Italy
György L. Balázs	Hungary	Marco Menegotto *	Italy
Nemkumar Banthia	Canada	Devdas Menon	India
Josée Bastien *	Canada	Barzin Mobasher	USA
Mony Ben-Bassat	Israel	Michel Moussard	France
Arnon Bentur	Israel	Harald S. Müller	Germany
Evan Bentz	Canada	Aurelio Muttoni	Switzerland
Emmanuel Bouchon	France	Tor Ole Olsen	Norway
Mikael W. Braestrup	Denmark	Alva Peled	Israel
Klaas Van Breugel	The Netherlands	Niels Peter Høj	Switzerland
Ezio Cadoni	Italy	Paolo E. Pinto	Italy
Eduardo C. Carvalho	Portugal	Giovanni Plizzari	Italy
Vladimir Cervenka	Czech Republic	Nigel Priestley	New Zealand
Andrzej Cholewicki	Poland	Marco di Prisco	Italy
Michael Collins	Canada	Oded Rabinovitch	Israel
Hugo Corres Peiretti	Spain	Andrei M. Reinhorn	USA
Manfred Curbach *	Germany	Miguel Fernández Ruiz	Switzerland
Israel David	Israel	Koji Sakai	Japan
Frank Dehn * <sup>1</sup>	Germany	Gerhard Sauer	Austria
Steven Denton	United Kingdom	Suresh Shah	USA
Yoram Eilon	USA	Eliezer Shamir	Israel
Michael Fardis *	Greece	Shamim Sheikh	Canada
David Fernández-Ordóñez	Spain	Viktor Sigrist	Germany
Craig Finley	USA	Johan Silfwerbrand	Sweden
Stephen Foster *	Australia	Luc Taerwe	Belgium
Yehoshua Frostig	Israel	François Toutlemonde	France
Hans-Rudolf Ganz	Switzerland	Thanasis Triantafillou	Greece
Ravindra Gettu	India	Tamon Ueda	Japan
V. N. Heggade	India	Lucie Vandewalle	Belgium
Steinar Helland	Norway	Frank Vecchio	Canada
Amnon Katz	Israel	Jan L. Vitek	Czech Republic
Jean-Francois Klein *	Switzerland	James K. Wight	USA
Konstantin Kovler	Israel	Jun Yamazaki	Japan
Theodor Krauthammer	USA	David Yankelevsky	Israel
Itai Leviathan *	Israel		

\* Lead reviewer

## Table of Contents

### Plenary Lectures

<b>Seismic Analyses of Damageable Concrete Structures</b>	<b>3</b>
<i>Andrei M. Reinhorn</i>	
University at Buffalo-SUNY, Buffalo, NY, USA	
<b>Construction with Concrete in an Era of Environmental Constraints</b>	<b>13</b>
<i>Arnon Bentu</i>	
Technion - Israel Institute of Technology, Israel	
<b>Superiority of Concrete Material in Tall Slender Structures</b>	<b>17</b>
<i>Silvian Marcus</i>	
WSP Cantor Seinuk, New York, NY, USA	
<b>The European approach to seismic engineering and codification for concrete structures</b>	<b>29</b>
<i>Michael N. Fardi</i>	
University of Patras, Greece	

### Topic 1. Advanced and innovative cementitious materials and concrete

<b>Tailor-made nano materials for improved matrix characteristics of cement-based systems in view of corrosion control</b>	<b>45</b>
<i>Klaas van Breugel<sup>1</sup>, Dessie. A. Koleva<sup>1</sup>, Jia Hu<sup>2</sup></i>	
<sup>1</sup> TU Delft, Netherlands, <sup>2</sup> South China University of Technology, China	
<b>Carbon nanotube cement-based sensors for dynamic monitoring of concrete structures</b>	<b>49</b>
<i>Luigi Materazzi, Filippo Ubertini, Antonella D'Alessandro</i>	
Department of Civil and Environmental Engineering – University of Perugia	
<b>Creep and shrinkage of high performance lightweight aggregate concrete</b>	<b>53</b>
<i>Müller, Harald S. and Kvitsel, Vladislav</i>	
Karlsruhe Institute of Technology (KIT) Materials Testing and Research Institute (MPA Karlsruhe)	
<b>Strengthening of concrete elements by layer of textile impregnated cement matrix</b>	<b>57</b>
<i>Alva Peled<sup>1</sup>, Michael Tsesarsky<sup>1</sup>, Amnon Katz<sup>2</sup>, Ido Anteby<sup>3</sup></i>	
<sup>1</sup> Ben Gurion University of the Negev, <sup>2</sup> Technion - Israel Institute of Technology, <sup>3</sup> Ben Gurion University of the Negev	
<b>High-temperature behavior of reduced-mass concrete containing expanded-polystyrene synthesized (EPS) Particles</b>	<b>61</b>
<i>Patrick Bamonte<sup>1</sup>, Pietro G. Gambarova<sup>1</sup>, Francesco Lo Monte<sup>1</sup>, Marisa Pecce<sup>2</sup></i>	
<sup>1</sup> Politecnico di Milano, Milan, Italy, <sup>2</sup> Università del Sannio, Benevento, Italy	
<b>Reinforced concrete columns incorporating glass powder under concentric axial loading</b>	<b>65</b>
<i>Arame Niang, Nathalie Roy, Arezki Tagnit-Hamou</i>	
Université de Sherbrooke	

<b>Full scale tests with lightweight woodchip concrete in composite slab constructions</b> <i>Andreas May and Daniele Waldmann</i> University of Luxembourg	69
<b>The influence of aggressive chemical environment on behaviour of high performance fibre reinforced concrete in condition of long-term bending performance</b> <i>Peter Paulík and Igor Hudoba</i> Slovak University of Technology Bratislava	73
<b>Delayed ettringite formation - outcomes of laboratory investigations carried out on protective treatments</b> <i>Linger Lionel<sup>1</sup>, Lavaud Stéphane<sup>2</sup>, Divet Loïc<sup>2</sup>, Boutillon Laurent<sup>1</sup></i> <sup>1</sup> VINCI Construction Grands Projets, <sup>2</sup> IFSTTAR	77
<b>New high performance foamed concrete</b> <i>François Jacquemot, Philippe Francisco, Patrick Rougeau</i> CERIB	81
<b>Characteristics and application possibilities of new CEM V cement types</b> <i>Klaus Voit<sup>1</sup>, Konrad Bergmeister<sup>1</sup>, Ivan Janotka<sup>2</sup>, Herbert Zeller<sup>3</sup></i> <sup>1</sup> University of Natural Resources and Life Sciences Vienna, Institute for Structural Engineering, Vienna, <sup>2</sup> Building, Testing and Research Institute (TSUS), Bratislava, Slovakia, <sup>3</sup> Schretter & Cie GmbH & Co KG, Vils/Tyrol, Austria	85
<b>Admixture and filler technologies for producing environmentally friendly concretes</b> <i>Amnon Katz and Arnon Bentur</i> Technion - Israel Institute of Technology	89
<b>A study on factors affecting the cores strength of self-consolidating concrete</b> <i>Lina Rojas-Henao<sup>1</sup>, Jaime Fernández-Gómez<sup>1</sup>, Juan Carlos López-Agüí<sup>2</sup>, Galit Agranati Landsberger<sup>3</sup></i> <sup>1</sup> Universidad Politecnica de Madrid, <sup>2</sup> IECA, <sup>3</sup> Technion - Israel Institute of Technology	93
<b>Influence of curing conditions on the mechanical and durability properties of concretes made with mineral lightweight aggregates</b> <i>Latifou Bello, Philippe Francisco, Patrick Rougeau, François Jacquemot</i> CERIB	97
<b>Alkali-activated mortars reinforced with steel fibers</b> <i>Luís Ferreira<sup>1</sup>, Hugo Costa<sup>2</sup>, Eduardo Júlio<sup>3</sup></i> <sup>1</sup> ICIST & DEC FCTUC, <sup>2</sup> ICIST & ISEC-IPC, <sup>3</sup> ICIST & DECivil IST UTL	101
<b>Hybrid fabrics as reinforcements for cement-based elements</b> <i>Zvi Cohen<sup>1</sup>, Alva Peled<sup>1</sup>, Barzin Mobasher<sup>2</sup></i> <sup>1</sup> Ben Gurion University, <sup>2</sup> Arizona State University	105
<b>Application of recycled concrete aggregates containing waste glass powder/suspension and bottom ash as a cement component in concrete</b> <i>Patricija Kara</i> Riga Technical University	109

<b>Uhpc – assessment of steel fibre distribution and matrix homogeneity</b> <i>Jiri Kolisko<sup>1</sup>, Milan Rydva<sup>2</sup>, Petr Hunka<sup>3</sup></i> <sup>1</sup> director, <sup>2</sup> doctoral student, <sup>3</sup> research assistant	113
<b>New generation of high performance cements for special concrete</b> <i>Vyatcheslav Falikman<sup>1</sup>, Nicolai Bashlykov<sup>2</sup>, Andrey Zvezdov<sup>3</sup></i> <sup>1</sup> Structural Concrete Association, <sup>2</sup> Polirelaks Ltd., <sup>3</sup> S&R Center "Construction"	117
<b>Experience with and potential of bacteria for self-healing concrete (*)</b> <i>Henk. M. Jonkers, Virgini Wiktor, Klaas van Breugel</i> TU Delft	121
<b>Textile reinforced concrete – practical applications (*)</b> <i>Michael Frenzel, Daniel Ehlig, Frank Schladitz, Manfred Curbach</i> Technische Universität Dresden	123

## Topic 2. Constitutive modelling of cementitious and composite materials

<b>Analytical and experimental compressive behavior of internally and externally confined reinforced-concrete columns</b> <i>Rami Eid, Rina Farhat, Nicolae Gluck, Uri Tzadka</i> SCE - Shamoan College of Engineering	127
<b>Influence of concrete cover on the anchoring length of FRP reinforcement</b> <i>David Horak and Petr Stepanek</i> Brno University of Technology	131
<b>Multi-level optimization of input parameters for modeling of fibre reinforced concrete</b> <i>Radomír Pukl<sup>1</sup>, Tereza Sajdlová<sup>1</sup>, David Lehký<sup>2</sup>, Drahomír Novák<sup>2</sup></i> <sup>1</sup> Červenka Consulting, <sup>2</sup> BUT Brno	135
<b>Characterisation of the tensile material properties of UHPFRC</b> <i>Norbert Randl, Sandra Ofner, Friedrich Däuber</i> Carinthia University of Applied Sciences	139
<b>Modeling of concrete behavior under severe triaxial load (*)</b> <i>Laurent Daudeville<sup>1</sup>, Xuan-Dung Vu<sup>1</sup>, Yann Malecot<sup>1</sup>, Matthieu Briffaut<sup>1</sup>, Bertrand Cirée<sup>2</sup></i> <sup>1</sup> University Joseph Fourier, <sup>2</sup> IRSN	143
<b>Discrete element modeling of concrete under triaxial loading based on X-ray tomographic images (*)</b> <i>Laurent Daudeville<sup>1</sup>, Ewa Piotrowska<sup>1</sup>, Philippe Marin<sup>2</sup>, Yann Malécot<sup>1</sup></i> <sup>1</sup> University Joseph Fourier, <sup>2</sup> Institut Polytechnique Grenoble	145
<b>Combination of autogenous and drying shrinkage of traditional concrete mixtures (*)</b> <i>klaas van Breugel, Renee M. Mors, W.J. (Jeanette) Bouwmeester-van den Bos</i> TU Delft	147

(\*) Abstract (the full paper is included in the e-proceedings)

<b>Analysis of multiple cracking in textile reinforced concrete (*)</b>	<b>149</b>
<i>Miroslav Vořechovský<sup>1</sup>, Rostislav Chudoba<sup>2</sup>, Rostislav Ryppl<sup>2</sup>, Josef Hegger<sup>2</sup></i>	
<sup>1</sup> Institute of Structural Mechanics, VUT Brno, Czech Republic, <sup>2</sup> Institute of Structural Concrete, RWTH Aachen, Germany	
<hr/>	
<b>Topic 3. Design concepts and structural modeling</b>	
<b>Safety evaluation in concrete structures</b>	<b>153</b>
<i>Diego Lorenzo Allais, Vincenzo Ilario Carbone, Giuseppe Mancini</i>	
Politecnico di Torino, Torino, Italy	
<b>Tensile membrane actions in concrete slabs: Investigation of the influence of reinforcement curtailment based on a real-scale test set-up</b>	<b>157</b>
<i>Dirk Gouverneur, Robby Caspeele, Luc Taerwe, Ruben Van Coile</i>	
Ghent University, Department of Structural Engineering	
<b>Measurement of drying shrinkage strain with full-scale test specimens for a PC box girder</b>	<b>161</b>
<i>Hitoshi KOBAYASHI<sup>1</sup>, Tsutomu SAKIMOTO<sup>2</sup>, Takashi FUJII<sup>3</sup>, Toshiki AYANO<sup>3</sup>, Toyo MIYAGAWA<sup>4</sup></i>	
<sup>1</sup> P.S. Mitsubishi Construction Co., Ltd., <sup>2</sup> Ministry of Land, Infrastructure, Transport and Tourism, <sup>3</sup> Okayama University, <sup>4</sup> Kyoto University	
<b>Topology optimization procedures for reinforced concrete design</b>	<b>165</b>
<i>Oded Amir</i>	
Technion - Israel Institute of Technology	
<b>Shear force and local punching resistance of slim biaxial hollow core floor slabs with flattened void formers</b>	<b>169</b>
<i>Christian Albrecht<sup>1</sup>, Andrej Albert<sup>2</sup>, Jürgen Schnell<sup>1</sup></i>	
<sup>1</sup> Institute of Concrete Structures and Structural Engineering, Technische Universität Kaiserslautern, Paul-Ehrlich-Straße, D-67663 Kaiserslautern, Germany, <sup>2</sup> Department of Civil Engineering, Hochschule Bochum, Lennerhofstraße 140, D-44801 Bochum, Germany	
<b>Seismic and compressive behavior of high-strength and fiber-reinforced concrete columns</b>	<b>173</b>
<i>Rami Eid<sup>1</sup> and Patrick Paultre<sup>2</sup></i>	
<sup>1</sup> SCE - Shamoon College of Engineering, <sup>2</sup> University of Sherbrooke	
<b>Design and displacements of precast concrete shear wall structures</b>	<b>177</b>
<i>ir. D.C. van Keulen<sup>1</sup> and Prof. Dipl.-Ing J.N.J.A. Vambersky<sup>2</sup></i>	
<sup>1</sup> TU Delft / Ingenieursstudio DCK, <sup>2</sup> TU Delft / Jan Vambersky BV	
<b>Life cycle structural modeling deterministic &amp; probabilistic performance prediction</b>	<b>181</b>
<i>Alfred Strauss, Konrad Bergmeister, Hirut Grossberger</i>	
Department of Civil Engineering and Natural Hazards, University of Natural Resources and Life Sciences, Vienna, Austria	

<b>High speed railroad bridges. Conception, bases of design, typological possibilities and construction methods</b>	<b>185</b>
<i>Hugo Corres Peiretti<sup>1</sup>, Alejandro Perez Caldentey<sup>2</sup>, Freddy Ariñez Fernandez<sup>3</sup></i>	
<sup>1</sup> Prof. Dr. Civil Engineer. Polytechnic University of Madrid. FHECOR Consulting Engineers., <sup>2</sup> Prof. PhD Civil Engineer. Polytechnic University of Madrid (UPM). FHECOR Consultant Engineers, <sup>3</sup> Researcher. Polytechnic University of Madrid	
<b>Optimum reinforcement design in concrete membrane element</b>	<b>189</b>
<i>Gabriele Bertagnoli, Luca Giordano, Giuseppe Mancini, Francesco Tondolo</i>	
Politecnico di Torino	
<b>Thin walled elements made of uhpfrc – connection and load transfer by the use of implants</b>	<b>193</b>
<i>Jan Mittelstädt and Werner Sobek</i>	
University of Stuttgart - ILEK	
<b>Experimental and Numerical Investigations of Sandwich Wall Panels with HPC-Facings</b>	<b>197</b>
<i>Frank Müller, Christian Kohlmeyer, Jürgen Schnell</i>	
TU Kaiserslautern	
<b>Probabilistic approach to the global resistance factors for reinforced concrete members</b>	<b>201</b>
<i>Milan Holicky and Miroslav Sykora</i>	
CTU in Prague	
<b>Two layer high performance concrete beams for bridges</b>	<b>205</b>
<i>Iakov Iskhakov and Yuri Ribakov</i>	
Ariel University Center of Samaria	
<b>Experimental testing and numerical modelling of foundation slab in interaction with subsoil</b>	<b>209</b>
<i>Radim Cajka<sup>1</sup>, Pavlina Mateckova<sup>1</sup>, Vojtech Buchta<sup>1</sup>, Kamil Burkovic<sup>2</sup></i>	
<sup>1</sup> Faculty of Civil Engineering, VSB TU Ostrava, <sup>2</sup> Arming, pspol. s r.o., Designing and building company, Ostrava, Czech Republic	
<b>Influence of construction site conditions on the properties of hardened concrete</b>	<b>213</b>
<i>Jesko Gerlach<sup>1</sup>, Michael Werner<sup>1</sup>, Ludger Lohaus<sup>2</sup>, Thomas Steinborn<sup>2</sup></i>	
<sup>1</sup> Institute of Building Materials Science, Leibniz Universität Hannover, <sup>2</sup> Institute of Building Materials	
<b>Tensile behavior of fibrous concrete with conventional reinforcement – a theoretical study</b>	<b>217</b>
<i>Yuri Karinski and Avraham Dancygier</i>	
Technion - Israel Institute of Technology	
<b>Uncertainties of resistance models for reinforced concrete structures</b>	<b>221</b>
<i>Miroslav Sykora<sup>1</sup>, Vladimír Cervenka<sup>2</sup>, Milan Holicky<sup>1</sup></i>	
<sup>1</sup> CTU in Prague, <sup>2</sup> Cervenka Consultinga, s r.o.	
<b>Comparison between brazilian and french code specifications of verification of bonded and unbonded prestressed concrete members</b>	<b>225</b>
<i>Paula Manica Lazzari, Américo Campos Filho, Francisco de Paula Simões Lopes Gastal</i>	
UFRGS	

(\*) Abstract (the full paper is included in the e-proceedings)

<b>Behavior of headed bars at cut-off points in reinforced concrete beams</b> <i>Sung-Gul Hong<sup>1</sup>, Eo-Jin Lee<sup>1</sup>, Sung-Chul Chun<sup>2</sup></i> <sup>1</sup> Seoul National University, <sup>2</sup> Mokpo National University	229
<b>ULS and SLS behaviour of UHP(FR)C beams with high strength reinforcement</b> <i>Norbert Randl and Csaba Simon</i> Carinthia University of Applied Sciences	233
<b>Evolutionary construction of cable stayed Bridges: determination of stay forces by energy Minimization</b> <i>Jose Antonio Lozano-Galant<sup>1</sup>, Lidia Ruiz-Ripoll<sup>1</sup>, Ignacio Payá-Zaforteza<sup>2</sup>, Jose Turmo<sup>3</sup></i> <sup>1</sup> Universidad de Castilla-La Mancha, Spain, <sup>2</sup> Universidad Politécnica de Valencia, ICITECH, <sup>3</sup> Universidad Politécnica de Barcelona, BarcelonaTech	237
<b>Numerical and experimental investigation of structural members made from RC and SFRC</b> <i>Radomir Pukl<sup>1</sup>, Petr Havlásek<sup>1</sup>, Petr Vitek<sup>2</sup>, Jan Vitek<sup>2</sup>, Miroslav Vokáč<sup>3</sup>, Petr Bouška<sup>3</sup>, Matouš Hilar<sup>4</sup></i> <sup>1</sup> Červenka Consulting, <sup>2</sup> Metrostav, a.s., <sup>3</sup> Klokner Institute CTU, <sup>4</sup> 3G Consulting Engineers	241
